

**Survivors need expert care.  
Most hospitals don't have it.**

80% of U.S. hospitals lack specialized SANE programs, forcing untrained staff into high-stakes exams. This results in:

93% SANE  
attrition rate

Increased litigation  
and regulatory risk

Compounded trauma  
for survivors

## Hospitals need expertise + tools

We provide a turnkey clinical model combining board-certified expertise with proprietary technology. We don't just provide a cart; we provide a lifeline for your local nursing team.

### The SAFE-T System Impact

**75%**

**Nurse Retention**

Nurses supported by SAFE-T have high 1-year retention rates.

*National Average: 7% after two years.*

**92%**

**Patient Satisfaction**

Survivors rate their SAFE-T supported care as "excellent" or "very good."

**3x**

**Patient Volume**

Partner hospitals see a significant increase in survivors seeking care locally.

#### Evidence-Based

Derived from over a decade of nurse-led research at Penn State

#### Clinically Proven

Recognized for transforming healthcare delivery by American Academy of Nursing

#### Legislative Support

Outcomes served as the foundation for Pennsylvania's SB414

# Easy-to-Use Tools for Forensic Excellence

Empower your team with the industry's most advanced, nurse-designed forensic technology.

## Our Proprietary Technology (included in both products)

### Forensic Imaging Device

High-definition imaging with a flexible arm stand and proprietary, voice-activated controls for hands-free zooming and imaging

### Mobile Telehealth Station

An ergonomic, telehealth cart designed by nurses to maneuver easily through standard bedside environments

### Secure Integrated Technology

A HIPAA-compliant cloud environment with Single Sign-On (SSO) for the secure storage and transmission of forensic medical records

## The ROI of Specialized Care

Offload the burden from ER physicians (saving 2–5 hours per exam)

Ensuring court-ready evidence collection.

## Our Products

### SAFE-T System

All-in-one turnkey clinical model with expert teleSANE support

### SAFE-T Tech

Purpose-built forensic technology for established SANE teams

**Empower your team. Protect your facility. Serve your community.**
